

CARING FOR YOUR BANNER

- *Banners are for short-term, temporary use only. Long-term application is determined per job as customer sees fit.
- *Do not expose to harsh chemicals; gasoline, motor oil, antifreeze, etc.
- *Clean with gentle soap and water. Dry completely before storing.
- *Roll banner for storage. Folding will leave creases and wrinkles and will eventually crack.
- *Secure with bungies, zip ties, clips or rope. Keep snug but don't overstretch. A good quality bungee allows some give in the wind.
- *Re-secure right away if a corner comes free. A loose corner will shred the banner right away.
- *If using it in a high wind area, cut 3-5" V slits in it to relieve wind pressure.
- *If securing to a backer, use a washer with each screw head and galvanized or coated screws.
- *Froggy's Signs can supply tubes or boxes for storage at request.

Froggy's Signs, Inc. accepts no responsibility for damage of any type. There is no warranty on banners.
